

FLYGT PUMP

GENERAL DESCRIPTION

Flygt vortex pumps are designed for reliability. The impeller does not require adjustment and runs freely in the volute, providing free flow-through passage of solids and liquids. This completely eliminates the risk of jamming and low performance that results from faulty impeller adjustments and wear.

The pump works with an Hydraulic motor.

SPECIFICATIONS

Activity:	Light dredging / pumping
Capacity:	200 m ³ / h
Head:	20 m
Output pipe:	150 mm

HYDRAULIC MOTOR

Power Unit:	external hydraulic unit with hoses
Hydraulic Pressure:	150 BAR max

Sede Legale:

Via G. Gandino, 20 – 40137 Bologna (BO) - Italy
